PROFESSIONAL SUMMARY

Cloud and Network Engineer with 7+ years in IT, currently supporting enterprise SD-WAN and Cisco networks. Builds AWS infrastructure with Terraform, including VPC networking, serverless APIs, security automation, keyless CI/CD (GitHub Actions + OIDC), and CloudWatch observability, all on GitHub with proof. AWS Solutions Architect - Associate, Azure Administrator, CCNP Security, and CCNA certified.

CLOUD PROJECTS (AWS + TERRAFORM)

- **Hub-and-Spoke VPC Network** (*VPC, Peering, Route Tables, EC2, Terraform*): Built a 3-VPC hub-and-spoke network from a reusable Terraform module; proved Dev/Prod isolation via non-transitive peering with live tests (0% vs 100% packet loss), using private-only EC2 access.
- **Serverless API with Observability** (*API Gateway, Lambda, DynamoDB, CloudWatch, SNS*): Runs my live portfolio visitor counter, secured with least-privilege IAM, CORS, and throttling; monitored by a CloudWatch dashboard, 4 SNS email alarms, and an AWS Budget, tested end to end.
- **Security Group Auto-Remediation** (*CloudTrail, EventBridge, Lambda, SNS*): Event-driven guardrail that detects SSH/RDP opened to 0.0.0.0/0, revokes only the risky rule within ~2 minutes, and emails who made the change.
- **Keyless CI/CD Pipeline** (*GitHub Actions, OIDC, IAM, S3, DynamoDB*): Replaced stored access keys with GitHub OIDC (1-hour, repo-scoped credentials); plan, apply, and smoke test on S3 remote state with DynamoDB locking. Debugged an OIDC AccessDenied via CloudTrail.

PROFESSIONAL EXPERIENCE

Network Support Engineer - CDK Global

Jan 2025 - Present

- Troubleshoot Cisco SD-WAN and VMware VeloCloud edge routers, resolving VPN, routing, NAT, firewall, and WAN failover issues across enterprise networks.
- Configure and maintain Cisco Meraki switching environments, including VLANs, trunk/access ports, STP, and Layer 3 connectivity.
- Monitor network performance and diagnose outages using SolarWinds and Wireshark packet captures to minimize downtime.

Senior IT Specialist - Danfoss

Aug 2023 - Jan 2025

- Administered user accounts, permissions, and access across Active Directory and Microsoft Azure/365, including provisioning, deprovisioning, and password resets.
- Resolved IT incidents end-to-end using ServiceNow, supporting cloud-based and on-premises systems.
- Provided technical support across hardware, software, and network issues, minimizing downtime for end users.

Software Engineer - Direct Components

Jun 2022 - Aug 2023

- Developed and maintained business applications on the Zoho platform, supporting application infrastructure and reliability.
- Wrote and optimized SQL queries for data retrieval, reporting, and application functionality.

TECHNICAL SKILLS

Networking & SD-WAN: Cisco, Meraki, SD-WAN, VMware VeloCloud, VPN, Routing & Switching, Firewalls, SolarWinds, Wireshark

Cloud (AWS Hands-On): VPC, EC2, S3, IAM, Lambda, API Gateway, DynamoDB, CloudWatch, SNS, EventBridge, CloudTrail, Budgets; Microsoft Azure Administration

Systems & Identity: Windows Server, Linux, Active Directory, Microsoft 365 Administration

Support & Incident Management: ServiceNow, Salesforce, Incident Management, SLA Compliance

IaC, DevOps & Scripting: Terraform, GitHub Actions (OIDC), Git, Python, Docker (familiar)

CERTIFICATIONS

AWS Certified Solutions Architect - Associate, Azure Administrator Associate (AZ-104), Cisco CCNP Security, Cisco CCNA, CompTIA A+, CompTIA Network+, CompTIA Security+, CompTIA Server+, ServiceNow CSA

EDUCATION

Arizona State University - B.S. Computer Science

Expected Nov 2027

St. Petersburg College - A.S. Web Development

May 2021

Canadian International College - B.S. Information Technology

May 2017
